(54) Title: FIXING RAIL OF TERMINAL BLOCK FOR ELECTRIC/ELECTRONIC COMPONENTS

(57) Abstract: Disclosed is a fixing rail of a terminal block capable of easily assembling various electric/electronic components. Electric/electronic devices and so forth in a control box, and facilitating the maintenance thereof, as well as the easy movement thereof. The fixing rail of a terminal block includes wings (12) extended from both sides of a C-shaped body (10), with a plurality of bodies arranged in a row, the respective bodies (10) provided at a center thereof with a hole (14), and a plurality of holes (14) formed at the bodies being spaced apart from each other at regular intervals. The fixing rail comprises a cutting groove (2) formed between the bodies, the cutting groove (2) provided at upper and lower portions of the body (10); and a gap (1) formed between ends of the wings (12), such that the fixing rail may be cut by a desired length using a hand or nipper, without using a cutter or a saw.
